Spring

Believe it or not, Spring is just around the corner. We have some great diving planned for this entire season. Start making your plans now and get your diving on the schedule before it fills up with other things.

The Bonne Terre trip is really a special dive and there's plenty of room yet at this writing. Join us for an unforgettable experience in this giant indoor lake loaded with mining equipment and incredible underwater formations created from the mining activities.

Oronogo, Missouri is the location of the Blue Water Lake, which was formerly an open pit mine. Airplanes and boats are just some of the things under the water. It's deep, a great place for some training dives, or just some deeper diving experience.

August will be a busy month. Most exciting of all is our Megladon Shark Tooth Diving Trip. We'll be diving off the east coast, looking for fossilized teeth up to seven inches long from the huge beasts who lived millions of years ago. We have one spot left (boat only holds six passengers.)

Check it out at: www.mymegteeth.com

Call for more detailed information on the trip.

"I'd like you to go scuba diving with me today, Smith. You'll be swimming near me with meat tide around you. That way you'll distract any sharks that may be in the area."
